

Caio Fukelmann Landau

Head of Mobile Development @ Mozio Group

Passionate engineer with over 8 years of experience. Android, iOS and frontend.

Assembled team of world-class developers with essentially zero turnover for 4+ years.

“ After working under Caio's leadership for almost 4 years, I can only speak wonders about him. Aside from being one of the best developers I've ever met, he is also an amazing boss and mentor [...]

Recently Published Work

Mozio SDK

This is an SDK that allows any developer to include a complete Mozio ride-booking experience inside their app. Available for both iOS and Android, the code is native - Kotlin and Swift:

- Documentation and details found here: <https://developer.mozio.com/mobile-sdk/>

Mozio native mobile apps

Native apps, written in Kotlin/Java and Swift:

- Android: <https://play.google.com/store/apps/details?id=com.mozio.android>
- iOS: <https://apps.apple.com/us/app/mozio-airport-rides-taxis/id1103373539>

Mozio driver apps

Those apps were developed with Flutter - a multi-platform library from Google:

- Android: <https://play.google.com/store/apps/details?id=com.mozio.driver>
- iOS: <https://apps.apple.com/us/app/mozio-driver/id1436530159>
